

Minister Jordan, our gratitude runs deep. Ocean deep.

Thank you for your decision to
phase out open-net salmon farms
in BC's Discovery Islands.

These pens cause significant harm to
our coastal waters and have left BC with
endangered wild Pacific salmon stocks,
threatened fishing and tourism industries,
and a legacy of neglect.

Along with the BC government and its
decision to protect the Broughton Archipelago,
you are helping all Canadians realize the
full value of our wild salmon stocks.

These are important steps we can all be
proud of, taking us closer to ending this
unsustainable practice.

Thank you from the depths of our waters.
We see a brighter future ahead.

Signed, The First Nations Leadership Council
